

Centralize Water Filtration Chamber

**Do you want to eliminate these and other heavy metal conditions in your water?**

**“Ensuring & Protecting Your Water for Outstanding Quality and Safety. We are your Bodyguard! “**

**Smells Like...**

**Rotten Eggs**

**Another reason to be concerned about hard water is its effect on your plumbing system. Calcium and magnesium deposits can build up in pipes, reducing flow to taps and appliances. In water heaters, these minerals generate a scale buildup that reduces the efficiency and life of the heater.**
